E-Z PULL SPLIT LOOM DISPENSER BOX

PULL

STORE

INSTALL

With our new E-Z-Pull packaging, you simply pull the split conduit out, cut it to the length desired, and then store the remaining tubing. The E-Z Pull system is sturdy and compact. Storing the E-Z Pull package on a shelf or at the job site is easier than ever. The self-contained inner reel allows the split conduit to dispense easily. If the box is not necessary the reel will fit on a wire spool rack for added convenience.

[HIGH TEMPERATURE NYLON
-40° – 300°F
BLACK WITH GREY STRIPE]

Split Loom Features

- Corrugated for flexibility
- Protects against abrasion, puncture and vibration
- Protects against heat, sunlight, water, snow, ice, salt and automotive fluids

Dispenser Box Features

- E-Z Pull Box keeps loom clean
- The interior reel dispenses tubing tangle free
